

(New Version) Passleader Provides Free Microsoft 70-411 PDF and VCE Dumps With New Update Questions (11-20)

Attention: These 70-411 Exam Questions Were Updated After 2014/7/1 With The Change Of New Microsoft Exam. 100 Percent Valid And 100 Percent Pass Ensure. Visit Our PassLeader Website And Get All Valid Exam Questions With PDF And VCE.]

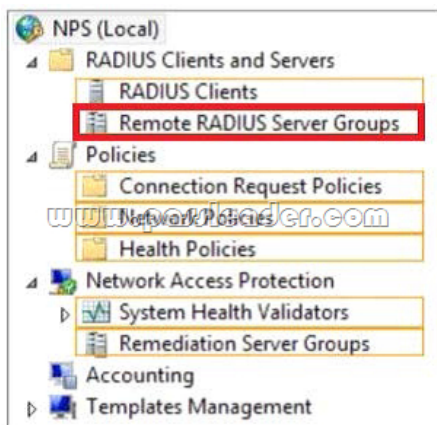

QUESTION 11 Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2012 R2. Server1 has the Network Policy Server server role installed. You need to allow connections that use 802.1x. What should you create? A. A network policy that uses Microsoft Protected EAP (PEAP) authentication B. A network policy that uses EAP-MSCHAP v2 authentication C. A connection request policy that uses EAP-MSCHAP v2 authentication D. A connection request policy that uses MS-CHAP v2 authentication

Answer: C **QUESTION 12** You have a server named Server1 that runs Windows Server 2012 R2. Server1 has the Remote Access server role installed. On Server1, you create a network policy named PPTP_Policy. You need to configure PPTP_Policy to apply only to VPN connections that use the PPTP protocol. What should you configure in PPTP_Policy? A. The Service Type B. The Tunnel Type C. The Framed Protocol D. The NAS Port Type

Answer: B **QUESTION 13** Your network contains a RADIUS server named Server1. You install a new server named Server2 that runs Windows Server 2012 R2 and has Network Policy Server (NPS) installed. You need to ensure that all accounting requests for Server2 are forwarded to Server1. On Server2, you configure a Connection Request Policy. What else should you configure on Server2? To answer, select the appropriate node in the answer area.

Answer:

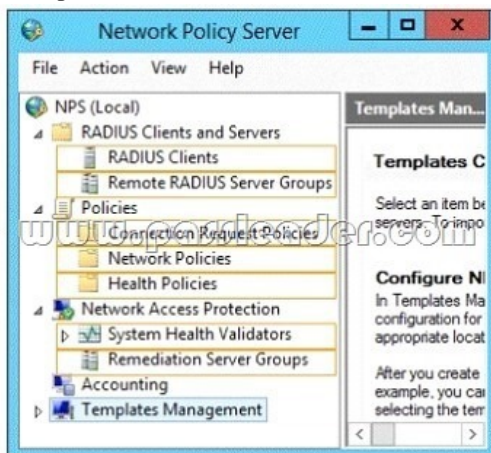

QUESTION 14 Your network contains two Active Directory forests named contoso.com and adatum.com. The contoso.com forest contains a server named server1.contoso.com. The adatum.com forest contains a server named server2.adatum.com. Both servers have the Network Policy Server role service installed. The network contains a server named Server3. Server3 is located in the perimeter network and has the Network Policy Server role service installed. You plan to configure Server3 as an authentication provider for several VPN servers. You need to ensure that RADIUS requests received by Server3 for a specific VPN server are always forwarded to server1.contoso.com. Which two should you configure on Server3? (Each correct answer presents part of the solution. Choose two.) A. Network policies B. Remote RADIUS server groups

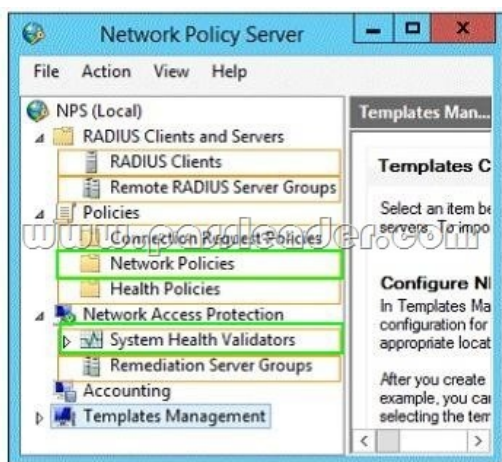

C. Connection authorization policies D. Remediation server groups
E. Connection request policies Answer: BE

<http://www.passleader.com/70-411.html>] QUESTION 15 Hotspot Question You have a server named Server1 that runs Windows Server 2012 R2. You configure Network Access Protection (NAP) on Server1. Your company implements a new security policy stating that all client computers must have the latest updates installed. The company informs all employees that they have two weeks to update their computer accordingly. You need to ensure that if the client computers have automatic updating disabled, they are provided with full access to the network until a specific date and time. Which two nodes should you configure? To answer, select the appropriate two nodes in the answer area.

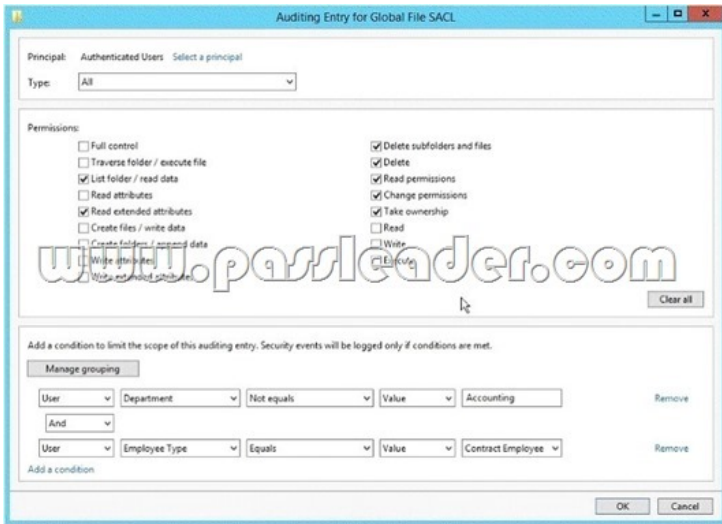

Answer:

QUESTION 16 Your network contains an Active Directory forest. The forest contains two domains named contoso.com and fabrikam.com. All of the DNS servers in both of the domains run Windows Server 2012 R2. The network contains two servers named Server1 and Server2. Server1 hosts an Active Directory-integrated zone for contoso.com. Server2 hosts an Active Directory-integrated zone for fabrikam.com. Server1 and Server2 connect to each other by using a WAN link. Client computers that connect to Server1 for name resolution cannot resolve names in fabrikam.com. You need to configure Server1 to support the resolution of names in fabrikam.com. The solution must ensure that users in contoso.com can resolve names in fabrikam.com if the WAN link fails. What should you do on Server1? A. Add a forwarder. B. Create a stub zone. C. Create a conditional forwarder. D. Create a secondary zone. Answer: D

QUESTION 17 Hotspot Question Your network contains an Active Director domain named contoso.com. The domain contains a file server named Server1. All servers run Windows Server 2012 R2. You have two user accounts named User1 and User2. User1 and User2 are the members of a group named Group1. User1 has the Department value set to Accounting, user2 has the Department value set to Marketing. Both users have the Employee Type value set to Contract Employee. You create the auditing entry as shown in the exhibit. (Click the Exhibit button.)

To answer, complete each statement according to the information presented in the exhibit. Each correct selection is worth one point.

Answer Area

To ensure that an audit event is logged when User1 deletes files on Server1, you must ...

- modify the Principal setting.
- modify the Permissions settings.
- modify the EmployeeType setting.
- modify the condition for the Department value.

You must ... to ensure that an audit event is logged when User2 opens files on Server1.

- add a condition
- modify the Principal setting
- modify the Permissions settings
- modify the condition for the Department value.

Answer:

Answer Area

To ensure that an audit event is logged when User1 deletes files on Server1, you must ...

- modify the Principal setting.
- modify the Permissions settings.
- modify the EmployeeType setting.
- modify the condition for the Department value.

You must ... to ensure that an audit event is logged when User2 opens files on Server1.

- add a condition
- modify the Principal setting
- modify the Permissions settings.
- modify the condition for the Department value.

QUESTION 18 Your network contains two servers named Server1 and Server2. Both servers run Windows Server 2012 R2 and have the DNS Server server role installed. Server1 hosts a primary zone for contoso.com. Server2 hosts a secondary zone for contoso.com. The zone is not configured to notify secondary servers of changes automatically. You update several records on Server1. You need to force the replication of the contoso.com zone records from Server1 to Server2. What should you do from Server2? A. Right-click Server2 and click Update Server Data Files. B. Right-click Server2 and click Refresh. C. Right-click the contoso.com zone and click Reload. D. Right-click the contoso.com zone and click Transfer from Master. Answer: D

QUESTION 19 Your network contains an Active Directory domain named contoso.com. All servers run Windows Server 2012 R2. The network contains several group Managed Service Accounts that are used by four member servers. You need to ensure that if a group Managed Service Account resets a password of a domain user account, an audit entry is created. You create a Group Policy object (GPO) named GPO1. What should you do next? A. In GPO1, configure the Advanced Audit Policy Configuration settings for Audit User Account Management. Link GPO1 to the Domain Controllers organizational unit (OU). B. In

GPO1, configure the Advanced Audit Policy Configuration settings for Audit User Account Management. Move the member servers to a new organizational unit (OU). Link GPO1 to the new OU. C. In GPO1, configure the Advanced Audit Policy Configuration settings for Audit Sensitive Privilege Use. Link GPO1 to the Domain Controllers organizational unit (OU). D. In GPO1, configure the Advanced Audit Policy Configuration settings for Audit Sensitive Privilege Use. Move the member servers to a new organizational unit (OU). Link GPO1 to the new OU. Answer: A QUESTION 20 You have a DNS server named Server1 that has a Server Core Installation on Windows Server 2012 R2. You need to view the time-to-live (TTL) value of a name server (NS) record that is cached by the DNS Server service on Server1. What should you run? A. Show-DNSServerCache B. dnscacheugc.exe C. ipconfig.exe /displaydns D. nslookup.exe Answer: A (New Version) Passleader Provides Free Microsoft 70-411 PDF and VCE Dumps With New Update Questions Click Here To Get The New Update And 100 Percent Valid & Pass 70-411 Exam Questions -- <http://www.passleader.com/70-411.html>]
