QUESTION 91 Your network consists of a single Active Directory domain. The domain contains a server that runs Windows Server 2008 R2 and that has the Remote Desktop Services server role installed. The server has six custom applications installed. The custom applications are configured as RemoteApps. You notice that when a user runs one of the applications, other users report that the server seems slow and that some applications become unresponsive. You need to ensure that active user sessions receive equal access to system resources. What should you do? A. Implement Remote Desktop Web Access. B. Implement Remote Desktop Connection Broker. C. Configure Performance Monitor. D. Implement Windows System Resource Manager. Answer: D Testlet: Humongous Insurance Humon1 (exhibit):

Humongous Insurance
Scenario:
COMPANY OVERVIEW
Humongous Insurance has a main office and 20 branch offices. The main office is located in New York. The branch offices are located throughout North America. The main office has 8,000 users. Each branch office has 2 to 250 users.
PLANNED CHANGES
Humongous Insurance plans to implement Windows BitLocker Drive Encryption (BitLocker) on all servers.
EXISTING ENVIRONMENT
The network contains servers that run either Windows Server 2003, Windows Server 2008, or Windows Server 2008 R2. All client computers run either Windows 7 Enterprise or Windows Vista Enterprise.
Business Goals
Humongous Insurance wants to minimize costs whenever possible.
Existing Active Directory/Directory Services
The network contains a single Active Directory forest named humongousinsurance.com. The forest contains two child domains named north.humongousinsurance.com and south.humongousinsurance.com. The functional level of the forest is Windows Server 2008 R2.

Humon2 (exhibit):

Existing Network Infrastructure

Each child domain contains a Web server that has Internet Information Services (IIS) installed. The forest root domain contains three Web servers that have IIS installed. The Web servers in the forest root domain are configured in a Network Load Balancing (NLB) cluster.

Currently, all of the Web servers use a single domain user account as a service account.

Windows Server Update Services (WSUS) is used for company-wide patch management. The WSUS servers do not store updates locally.

The network contains Remote Desktop servers that run Windows Server 2008 R2.

Users in the sales department access a line-of-business application by using Remote Desktop.

Managers in the sales department use the application to generate reports. Generating the reports is CPU intensive.

The sales managers report that when many users are connected to the servers, the reports take a long time to process.

Humongous Insurance has the following standard server builds:

- Class 1 - Dual x64 CPUs, 4-GB RAM, Windows Web Server 2008 R2
- Class 2 - Dual x64 CPUs, 4-GB RAM, Windows Server 2008 R2 Standard
- Class 3 - Quad x64 CPUs, 8-GB RAM, Windows Server 2008 R2 Standard
- Class 4 - Quad x64 CPUs, 8-GB RAM, Windows Server 2008 R2 Enterprise

Current Administration Model

Humongous Insurance currently uses the following technologies to manage the network:

- Microsoft Desktop Optimization Pack
- Microsoft Forefront EndPoint Protection
- Microsoft System Center Operations Manager
- Microsoft System Center Configuration Manager

TECHNICAL REQUIREMENTS

Humongous Insurance must meet the following technical requirements:

- A certificate must be required to recover BitLocker-protected drives.
- Newly implemented technologies must minimize the impact on LAN traffic.
- Newly implemented technologies must minimize the storage requirements.
- The management of disk volumes and shared folders must be performed remotely whenever possible.
- Newly implemented technologies must minimize the amount of bandwidth used on Internet connections.
- All patches and updates must be tested in a non-production environment before they are applied to production servers.
- Multiple versions of a Group Policy object (GPO) must be maintained in a central archive to facilitate a rol required.

The management of passwords and service principal names (SPNs) for all service accounts must be automated whenever possible.

QUESTION 92 You need to recommend a BitLocker recovery method that meets the company's technical requirements. Which recovery method should you recommend? A. a data recovery agent B. a recovery key C. a recovery password printed and stored in a secure location D. a recovery password stored in Active Directory Answer: A Testlet: Humongous Insurance QUESTION 93 You need to recommend a data management solution that meets the company's technical requirements. What should you include in the recommendation? A. DFS Management B. File Server Resource Manager (FSRM) C. Share and Storage Management D. Storage Explorer Answer: C Testlet: Humongous Insurance QUESTION 94 You need to recommend a server build for the Web servers. Which server build should you recommend? A. Class 1 B. Class 2 C. Class 3 D. Class 4 Answer: A Testlet: Humongous Insurance QUESTION 95 You need to recommend a strategy for using managed service accounts on the Web servers. How many managed service accounts should you recommend? A. 1 B. 2 C. 3 D. 5 Answer: D Testlet: Humongous Insurance QUESTION 96 You need to recommend a solution for managing GPOs. The solution must meet the company's technical requirements. What should you include in the recommendation? A. Desktop Optimization Pack B. Forefront EndPoint Protection C. System Center Configuration Manager D. System Center Operations Manager Answer: A Testlet: Humongous Insurance QUESTION 97 You are evaluating whether to use express installation files as an update distribution mechanism. Which technical requirement is met by using the express installation files? A. Newly implemented technologies must minimize the impact on LAN traffic. B. Newly implemented technologies must minimize the storage requirements. C. Newly implemented technologies must minimize the amount of bandwidth used on Internet connections. D. All patches and updates must be tested in a nonproduction environment before they are applied to production servers. Answer: A Testlet: Humongous Insurance QUESTION 98 You need to recommend a solution to decrease the amount of time it takes for the sales managers to generate reports. What should you include in the recommendation? A. Desktop Optimization Pack B. File Server Resource Manager (FSRM) C. Remote Desktop Connection Broker (RD Connection Broker) D. Windows System Resource Manager (WSRM) Answer: D Testlet: Humongous Insurance QUESTION 99 You need to recommend a solution to decrease the amount of time it takes for the sales managers to generate reports. What should you include in the recommendation? A. Implement Windows System Resource Manager (WSRM) on the Remote Desktop servers. B. Implement File Server Resource Manager (FSRM) on the Remote Desktop servers. C. Implement Windows System Resource Manager (WSRM) on the web servers. D. Implement File Server Resource Manager (FSRM) on the web servers. Answer: A Testlet: Humongous Insurance QUESTION 100 You need to recommend a strategy for using managed service accounts on the Web servers. Which managed service accounts should you recommend? A. One account for all the web servers. B. One account for each web server. C. One account for the parent domain and one account for both child domains. D. One account for

the parent domain and one account for each child domain. Answer: B

Woodgrove Bank

Scenario:

COMPANY OVERVIEW

Overview

Woodgrove Bank is an international financial organization.

Physical Location

The company has a main office and multiple branch offices.

EXISTING ENVIRONMENT

Active Directory Environment

The network contains one Active Directory forest. A separate domain exists for each office.

Network Infrastructure

All offices have domain controllers that are configured as DNS servers. All client computers are configured to use their respective office only.

The main office has the following servers and client computers:

- One Windows Server Update Services (WSUS) server.
- Client computers that run either Windows XP Service Pack 3 (SP3) or Windows 7.
- Ten file servers that host multiple shared folders. The file servers run either Windows Server 2003 or Windows Server 2008.
- One domain-based Distributed File System (DFS) namespace that has two replicated DFS namespaces configured to use Windows 2000 Server mode.

Each branch office has a WAN link to the main office. The WAN links are highly saturated.

All of the client computers in the branch offices run Windows 7.

User Problems

Users report that it is difficult to find the shared folders on the network.

Woodgrove2 (exhibit):

REQUIREMENTS

Planned Changes

Woodgrove Bank plans to implement the following changes:

- Deploy a new application named Appl on each client computer. Appl has a Windows Installer package and is compatible with Windows XP, Windows Vista, and Windows 7.
- Designate a user in each office to manage the address information of the user accounts in that office.
- Deploy a new branch office named Branch22 that has the following servers:

Technical Requirements

Woodgrove Bank must meet the following technical requirements:

- Minimize hardware and software costs, whenever possible.
- Encrypt all DNS replication traffic between the DNS servers.
- Ensure that users in the branch offices can access the DFS targets if a WAN link fails.
- Ensure that users can only view the list of DFS targets to which they are assigned permissions.
- Minimize the amount of network traffic between the main office and the branch offices, whenever possible.
- Minimize the amount of name resolution traffic from the branch offices to the DNS servers in the main office.
- Ensure that the administrators in the main office manage all Windows update approvals and all computer groups.
- Manage all of the share permissions and the folder permissions for the file servers from a single management console.
- Ensure that if a file on a file server is deleted accidentally, users can revert to a previous version of the file without administrator intervention.
- Ensure that administrators are notified by e-mail each time a user successfully copies a file that has an .avi extension to one of the file servers.

Security Requirements

Woodgrove Bank must meet the following security requirements:

- Access rights and user rights must be minimized.
- The Guest account must be disabled on all servers.
- Internet Information Services (IIS) must only be installed on authorized servers.

QUESTION 101 You need to recommend a solution to minimize the amount of time it takes for the legal department users to locate files in the Legal share. What should you include in the recommendation? A. File Server Resource Manager (FSRM) B. Print and Document Services C. Services for Network File System (NFS) D. Windows Search Service Answer: D Testlet: Woodgrove Bank

QUESTION 102 You need to recommend a solution for deploying Appl. The solution must support the company's planned changes. What should you include in the recommendation? A. Group Policy Software Installation B. Microsoft Application Virtualization (App-V) C. Microsoft Enterprise Desktop Virtualization (MED-V) D. Microsoft System Center Configuration Manager Answer: A Testlet: Humongous Insurance

QUESTION 103 You need to recommend a solution for managing the shared folders that meets the company's technical requirements. What should you include in the recommendation? A. Computer Management B. File Server

Resource Manager (FSRM)C. Share and Storage ManagementD. Storage Explorer Answer: A Testlet: Humongous Insurance

QUESTION 104You need to recommend changes to the name resolution infrastructure that meet the company's technical requirements. What should you recommend? A. Create a stub zone on all of the DNS servers in the branch offices.B. Create a secondary zone on all of the DNS servers in the branch offices.C. Move the DNS zone of the root domain to the ForestDnsZones application directory partition.D. Move the DNS zone of each branch office to the ForestDnsZones application directory partition.

Answer: C Testlet: Humongous Insurance QUESTION 105You need to recommend a monitoring solution for the file servers in the main office. The solution must meet the company's technical requirements. What should you include in the recommendation? A.

File Server Resource Manager (FSRM) active file screensB. File Server Resource Manager (FSRM) passive file screensC.

Performance Monitor alertsD. Performance Monitor logs Answer: B Testlet: Humongous Insurance QUESTION 106You plan to

implement a WSUS server in a branch office. You need to recommend a solution for deploying the WSUS server that meets the

company's technical requirements. What should you include in the recommendation? A. an autonomous WSUS server that is configured to download updates from Microsoft UpdateB. an autonomous WSUS server that is configured to download updates from the WSUS server in the main officeC. a WSUS server running in replica mode that is configured to download updates from Microsoft UpdateD. a WSUS server running in replica mode that is configured to download updates from the WSUS server in the main office Answer: C Testlet: Humongous Insurance QUESTION 107You need to recommend a file recovery solution that meets

the company's technical requirements. What should you include in the recommendation? A. Distributed File System (DFS) ReplicationB. File Server Resource Manager (FSRM) active file screensC. shadow copiesD. Windows Storage Server 2008

Answer: C Testlet: Humongous Insurance QUESTION 108You need to recommend changes to the network that address the user

problems statement. What should you recommend? A. Deploy DirectAccess.B. Configure folder redirection.C. Create a

volume mount point.D. Implement additional DFS targets. Answer: D Testlet: Humongous Insurance QUESTION 109You need to

recommend changes to the DFS infrastructure that meet the company's technical requirements. What should you recommend? A.

Modify the NTFS permissions and the share permissions of the DFS targets.B. Modify the referrals settings of the DFS namespace

and the NTFS permissions of the DFS targets.C. Migrate the namespace to Windows Server 2008 mode and modify the referrals

settings.D. Migrate the namespace to Windows Server 2008 mode and enable accessbased enumeration (ABE). Answer: D Testlet:

Humongous Insurance QUESTION 110You need to ensure that all servers meet the company's security requirements. Which tool

should you use? A. Microsoft Baseline Security Analyzer (MBSA)B. Microsoft Security Assessment Tool (MSAT)C.

Resultant Set of Policy (RSOP)D. Security Configuration Wizard (SCW) Answer: A
