Testlet: Humongous Insurance QUESTION 111 You need to recommend changes to the DFS infrastructure that meet the company's technical requirements. What should you recommend implementing in each branch office? (Each correct answer presents part of the solution. Choose two.) A. a DFS namespace server B. a DFS replica C. a standalone DFS namespace D. BranchCache in Distributed Cache mode E. BranchCache in Hosted Cache mode Answer: AB Testlet: Humongous Insurance QUESTION 112 You need to recommend a solution for managing the address information of the user accounts. The solution must meet the company's security requirements. What should you include in the recommendation? A. Active Directory delegation B. Authorization Manager C. built-in security groups D. user rights assignments Answer: A Testlet: Baldwin Museum of Science museum1 (exhibit): Baldwin Museum of Science

Scenario:
COMPANY OVERVIEW
The Baldwin Museum of Science is an internationally renowned museum of science history.
Physical Location
The museum has a main office and a branch office named Branch1. The main office has 5,000 users. Branch1 has 1,000 users.
The main office connects to Branch1 by using a WAN link. The WAN link is highly saturated.
The museum has a sales department. All of the users in the sales department have client computers that run Windows XP Service Pack 3 (SP3).
EXISTING ENVIRONMENT
Active Directory Environment
The network contains one Active Directory forest. The forest contains two domains named [ad.baldwinmuseumofscience.com](#) and [ad.baldwinmuseumofscience.com](#).
All user accounts and computer accounts for all employees are in the [ad.baldwinmuseumofscience.com](#) domain. The organizational unit (OU) structure for [ad.baldwinmuseumofscience.com](#) is shown in the exhibit. (Click the Case Study Exhibits button.)

www.passleader.com

museum2 (exhibit):

The network contains the following servers and applications:

- Application servers that run either Windows Server 2003 Service Pack 2 (SP2), Windows Server 2008 SP2, or Windows Server 2008 R2.
- A custom application named Appl that runs on all of the application servers. Appl writes events to the application log.
- A line-of-business application named App2 that requires Internet Explorer 6. All of the users in the sales department run App2.
- File servers that run Windows Server 2008 R2.

The main office has the following:

- A two-node failover cluster that runs Windows Server 2008 R2 and has the Hyper-V role installed and a Clustered Shared Volume. The failover cluster hosts four virtual machines (VM) that run Windows Server 2008 R2. The VMs are stored on the Clustered Shared Volume. Each VM runs Microsoft SQL Server 2008.
- A server named Server1 that hosts two shared folders named Share1 and Share2. Share1 hosts 50,000 research documents that are shared by multiple users. Share2 hosts documents that are created by users in the sales department.

Administration Model

All users in Branch 1 are members of global groups and universal groups. The groups are located in an OU named Groups in the ad.baldwinmuseumofscience.com domain.

www.passleader.com

museum3 (exhibit) REQUIREMENTS

Planned Changes

The Baldwin Museum of Science plans to implement a new branch office named Branch2. Branch2 will be configured as a separate Active Directory site.

Branch2 will be configured to meet the following requirements:

- Minimize the cost of deploying new servers.
- Contain only client computers that run Windows 7.
- Connect to the main office by using a saturated WAN link.
- Contain only servers that run Windows Server 2008 R2. The servers will be configured as either file servers or Web servers. The file shares on the file servers must be available if a single file server fails.
- In Branch2, if a single domain controller or a WAN link fails, users in the branch must be able to:
 - Change their passwords.
 - Log on to their client computers.

Technical Requirements

The Baldwin Museum of Science must meet the following technical requirements:

- Hardware and software costs must be minimized whenever possible.
- All VMs must be backed up twice a day.
- All VM backups must include the VM configuration information.
- Events generated by Appl must be stored in a central location.
- An administrator must be notified by e-mail when Appl generates an error.
- The number of permissions assigned to help desk technicians must be minimized.
- The help desk technicians must be able to reset the passwords and modify the membership of all users in Branch1.
- If a user overwrites another user's research document, the user must be able to recover a previous version of the document.
- When users in the sales department work remotely, they must be able to access the files in Share1 in the minimum amount of time.

Security

The Baldwin Museum of Science must meet the following security requirements:

- All scripts that run on production servers must be signed.
- Managers in Branch1 must be allowed to access the Internet at all times.
- Web site administrators must not be required to log on interactively to Web servers.
- Users in Branch1 must only be allowed to access the Internet between 12:00 and 13:00.
- Users and managers must be prevented from downloading executable files from the Internet.
- Administration of the corporate Web sites must support all bulk changes and scheduled content updates.

QUESTION 113 You need to recommend a domain controller deployment strategy for Branch2 that meets the museum's technical requirements. What should you recommend for Branch2? A. Deploy two writable domain controllers in ad.baldwinmuseumofscience. Configure both domain controllers as global catalog servers. B. Deploy two read only domain controllers (RODCs) in ad.baldwinmuseumofscience. Configure both RODCs as global catalog servers. C. Deploy one writable domain controller in baldwinmuseumofscience.com and one writable domain controller in ad.baldwinmuseumofscience. Enable universal group membership caching. D. Deploy one read only domain controller (RODC) in baldwinmuseumofscience.com and one writable domain controller in ad.baldwinmuseumofscience. Enable universal group membership caching. Answer: A Testlet: Baldwin Museum of Science QUESTION 114 You need to recommend a high availability solution for the file servers in Branch2 that supports the museum's planned changes. What should you include in the recommendation? A. a standalone Distributed File System (DFS) namespace and DFS Replication B. a domain based Distributed File System (DFS) namespace and DFS Replication C. Failover Clustering and Clustered Shared Volumes D. Network Load Balancing (NLB) and Storage Manager Answer: B Testlet: Baldwin Museum of Science QUESTION 115 You need to recommend an administrative solution for the help desk technicians that meets the museum's technical requirements. What should you recommend? A. Add the help desk technicians to the Domain Admins group. B. Add the help desk technicians to the Accounts Operators group. C. Assign permissions for the Groups OU and the Branch1 OU to the help desk technicians. D. Assign permissions for the domain object and the Users container to the help desk technicians. Answer: C Testlet: Baldwin Museum of Science QUESTION 116 You are planning to upgrade the

client computers of the users in the sales department to Windows 7. You need to recommend an upgrade solution to ensure that the client computers can run App2. What should you include in the recommendation? A. Internet Explorer Administration Kit (IEAK) B. Microsoft Application Compatibility Toolkit (ACT) C. Microsoft Application Virtualization (AppV) D. Microsoft Enterprise Desktop Virtualization (MEDV) Answer: D Testlet: Baldwin Museum of Science QUESTION 117 You need to recommend a solution for controlling access to the Internet. The solution must meet the museum's security policy. What should you include in the recommendation? A. File Server Resource Manager (FSRM) file screens and Group Policy objects (GPOs) B. Microsoft Forefront Threat Management Gateway (TMG) 2010 C. Microsoft Forefront Unified Access Gateway (UAG) 2010 D. Windows Firewall with Advanced Security and Group Policy objects (GPOs) Answer: B Testlet: Baldwin Museum of Science QUESTION 118 You need to recommend a management solution for the corporate Web sites that meets the museum's security policy. What should you include in the recommendation? A. Internet Information Services (IIS) Manager B. Remote Desktop Services (RDS) C. Remote Server Administration Tools (RSAT) D. Windows PowerShell 2.0 Answer: D Testlet: Baldwin Museum of Science QUESTION 119 You need to recommend an access solution for the users in the sales department that meets the museum's technical requirements. What should you include in the recommendation? A. BranchCache in Distributed Cache mode B. BranchCache in Hosted Cache mode C. offline files D. transparent caching Answer: C Testlet: Baldwin Museum of Science QUESTION 120 You need to recommend a backup solution for the VMs that meets the museum's technical requirements. What should you include in the recommendation? A. On each VM, perform a full server backup by using Windows Server Backup. B. On each physical node, perform a full server backup by using Windows Server Backup. C. Deploy Microsoft System Center Data Protection Manager 2010 and create a new protection group. D. Deploy Microsoft System Center Virtual Machine Manager (VMM) 2008 R2 and schedule checkpoints Answer: C

<http://www.passleader.com/70-646.html> Testlet: Baldwin Museum of Science QUESTION 121 You need to recommend a monitoring solution for App1 that meets the museum's technical requirements. What should you include in the recommendation? A. event subscriptions B. Microsoft SharePoint Foundation 2010 alerts C. Microsoft System Center Operations Manager 2007 R2 and the SMTP service D. Resource Monitor Answer: A Testlet: Baldwin Museum of Science QUESTION 122 You need to recommend a solution for the research documents that meets the museum's technical requirements. What should you recommend? A. On all client computers, enable shadow copies and configure the Previous Versions client settings. B. On Server1, enable shadow copies. On all client computers, configure the Previous Versions client settings. C. Deploy Microsoft SharePoint Foundation 2010, and then migrate Share1 to a new document library. Modify the blocked file types. D. Deploy Microsoft SharePoint Foundation 2010, and then migrate Share1 to a new document library. Enable versioning for the library. Answer: D Testlet: Contoso, Ltd Cotonso1 (exhibit):

Contoso, Ltd.

Scenario:

COMPANY OVERVIEW

Contoso, Ltd. is a consulting company that has a main office and two branch offices. The main office is located in Johannesburg. The branch offices are located in Brisbane and Montreal. The Johannesburg office has 400 users. Each branch office has 100 users.

PLANNED CHANGES

Contoso plans to open a new branch office. The new office will have a 512-Kbps connection to the Montreal office and a 2-Mbps connection to the Internet.

The new branch office will have a domain controller, a DirectAccess server, a file server, and a Web server. All branch office servers will be virtualized.

Contoso plans to implement role-based access control for all new virtual machines (VMs) deployed on Hyper-V servers.

In the new branch office, a user named User1 must be permitted to perform only the following actions on the Hyper-V server:

- Start the VMs.
- View the configuration of the VMs.

www.passleader.com

EXISTING ENVIRONMENT

All servers run Windows Server 2008 R2. All client computers run Windows 7 Enterprise.

The main office has multiple file servers. Each branch office has one file server. Each file server has two hard disks. One disk has the server's operating system installed and the other disk stores data files. File server backups are performed regularly.

The main office has a Windows Server Update Services (WSUS) server. All client computers are configured to receive updates from the WSUS server.

The main office connects to each branch office by using a 512-Kbps WAN link.

Existing Active Directory/Directory Services

The network contains a single Active Directory domain named contoso.com. An Active Directory site exists for each office. Each Active Directory site contains three subnets. Each subnet contains client computers.

The main office has two domain controllers. Each branch office has one domain controller.

Cotonso2 (exhibit): REQUIREMENTS

Storage Requirements

Contoso must meet the following storage requirements:

- Improve data availability on the file servers.
- Improve the performance of the file servers.
- Limit each user's storage space on the file servers to 2 GB.
- Prevent users from storing audio and video files on the file servers.
- Provide additional storage on the file servers without causing downtime.
- Enable users to access the previous versions of all the files stored on the file servers.

Technical Requirements

Contoso must meet the following technical requirements:

- Minimize the potential attack surface.
- Minimize WAN link utilization between the offices.
- Minimize the number of server licenses purchased.
- Minimize server downtime caused by applying updates.
- Minimize the amount of administrative effort required to approve the updates.
- Minimize the amount of time it takes for users in the branch offices to access files on the file servers in the main office.

Problem Statements

Users in the accounting department use a custom application named Appl. The configurations for Appl can only be changed by editing the registry. Currently, a technician must visit each client computer in the accounting department to change the Appl configurations.

www.passleader.com

QUESTION 123 You need to recommend a solution for users in the branch office to access files in the main office. What should you include in the recommendation? A. a BranchCache server that operates in Distributed Cache mode B. a BranchCache server that operates in Hosted Cache mode C. a domainbased Distributed File System (DFS) namespace and DFS Replication D. a standalone Distributed File System (DFS) namespace and DFS Replication Answer: B Testlet: Contoso, Ltd QUESTION 124 You need to recommend a solution for managing Appl. The solution must require the minimum amount of administrative effort. What should you include in the recommendation? A. Group Policy Administrative Templates B. Group Policy Preferences C. Group Policy Software Settings D. Windows Remote Management (WinRM) Answer: B Testlet: Contoso, Ltd QUESTION 125 You need to recommend a solution for the file servers in the branch offices that meets the storage Requirements. What should you include in the recommendation? A. Distributed File System (DFS) and access-based enumeration (ABE) B. File Server Resource Manager (FSRM) quotas and file screens C. NTFS disk quotas and NTFS permissions D. Services for Network File System (NFS) and offline files Answer: B Testlet: Contoso, Ltd QUESTION 126 You are evaluating whether to add an additional hard disk drive to each file server and create a striped volume for the data files. Which storage requirement is met by adding the hard disk drive and creating the striped volume? A. Improve data availability on the file servers. B. Improve the performance of the file servers. C. Provide additional storage on the file servers without causing downtime. D. Enable users to access the previous versions of all the files stored on the file servers. Answer: B Testlet: Contoso, Ltd QUESTION 127 You need to recommend a solution that enables

User1 to perform the required actions on the HyperV server. What should you include in the recommendation? A. Active Directory delegation B. Authorization Manager role assignment C. local security groups on the Hyper-V server D. local security groups on the VMs
 Answer: B
 Testlet: Contoso, Ltd
 QUESTION 128 You need to identify which operating system must be installed on the HyperV server in the new branch office. Which operating system should you identify? A. a Server Core installation of Windows Server 2008 R2 Enterprise B. a Server Core installation of Windows Server 2008 R2 Standard C. Windows Server 2008 R2 Enterprise D. Windows Server 2008 R2 Standard
 Answer: A
 Testlet: Contoso, Ltd
 QUESTION 129 You need to recommend a Windows update strategy for the new branch office. What should you recommend doing in the new branch office? A. Deploy WSUS in replica mode. Configure updates to be stored on the new WSUS server. B. Deploy WSUS in autonomous mode. Configure updates to be stored on the new WSUS server. C. Deploy WSUS in replica mode. Configure the WSUS clients to retrieve updates from Microsoft Update. D. Deploy WSUS in autonomous mode. Configure the WSUS clients to retrieve updates from Microsoft Update.
 Answer: C
 Testlet: Graphic Design Institute, Case A
 GDIA1 (exhibit):

Graphic Design Institute, Case A

Scenario

COMPANY OVERVIEW

Graphic Design Institute is a training company that has a main office and 10 branch offices. The main office is located in Bangalore.

PLANNED CHANGES

Graphic Design Institute plans to implement the following changes:

- Deploy a new two-node failover cluster that runs the Hyper-V server role on each node.
- Ensure that intra-cluster network traffic is isolated from all other network traffic.
- Implement Network Access Protection (NAP) for all of the client computers on the internal network.

EXISTING ENVIRONMENT

The relevant servers in the main office are configured as shown in the following table.

| Server name | Operating system | Server role or role service |
|-------------|------------------------|---|
| Web1 | Windows Server 2008 R2 | Web Server (IIS) |
| Web2 | Windows Server 2008 R2 | Web Server (IIS) |
| Web3 | Windows Server 2008 R2 | Web Server (IIS) |
| WSUS1 | Windows Server 2008 R2 | Windows Server Update Services (WSUS) |
| NPAS1 | Windows Server 2008 R2 | Network Policy and Access Services (NPAS) |

- NPAS1 contains a static IP address pool.
- Web1, Web2, and Web3 host a copy of the corporate Web site.
- Web1, Web2, and Web3 are located in the perimeter network and belong to a workgroup.

All client computers run Windows XP Professional, Windows Vista Enterprise, or Windows 7 Enterprise. Some users work remotely. To access the company's internal resources, the remote users use a VPN.

Existing Active Directors/Directory Services

The network contains a single-domain Active Directory forest named graphicdesigninstitute.com. The Active Directory Recycle Bin is enabled.

Existing Network Infrastructure

Graphic Design Institute has an internal network and a perimeter network. The network contains network switches and wireless access points (WAPs) from multiple vendors. Some of the network devices are more than 10 years old and do not support port-based authentication.

GDIA2 (exhibit): TECHNICAL REQUIREMENTS

- All of the accounts used for administration must be assigned the minimum amount of permissions.
- Web1, Web2, and Web3 must have the identical configurations for the corporate Web site. The Web servers must contain a local copy of all the Web pages in the Web site. When a Web page is modified on any of the Web servers, the modifications must be copied automatically to all of the Web servers.
- A user named Admin1 must be responsible for performing the following tasks:
 - Restarting all of the Web servers.
 - Backing up and restoring the files on all of the Web servers.
- A user named Admin2 must be responsible for performing the following tasks:
 - Backing up the Active Directory database.
 - Recovering deleted objects from the Active Directory Recycle Bin.

www.passleader.com

QUESTION 130 You need to recommend a solution for configuring the Web servers. The solution must meet the company's technical requirements. What should you include in the recommendations? A. Active Directory Lightweight Directory Services (AD LDS) B. Failover Clustering C. HTTP redirection D. IIS Shared Configuration
 Answer: D
