

Passleader SK0-003 Study Materials Covers All Knowledge Points Of Real Exam Ensure 100% Pass (21-40)

QUESTION 21 An administrator is setting up software RAID 5 on a Windows Server with two volumes for two separate hard drives, but the option for RAID 5 is grayed out. Which of the following is the MOST likely reason why? A. The disks have been setup as dynamic. B. Windows does not support software RAID 5. C. RAID 5 requires three volumes. D. The page file must be at least 4GB to support RAID 5. Answer: C

QUESTION 22 A Windows file server has run out of space. In the interim the administrator is moving several archived confidential folders that have been encrypted off the file server and onto an older servers file shares. After the move, a manager reports that they are able to access and modify some of the items that have been moved. Which of the following is the MOST likely issue? A. The temporary server was formatted as NTFS. B. The manager is a power user on the temporary server. C. The temporary server was formatted as FAT32. D. The manager is an administrator on the temporary server. Answer: C

QUESTION 23 When considering SAN to SAN replication between sites, which of the following is the MOST important concern? A. WAN link speed B. Block size C. Disk size D. File system type Answer: A

QUESTION 24 Which of the following is a differentiating feature of file permissions as compared to share permissions? A. File permissions are less granular than share permissions. B. Full control can only be set using file permissions. C. File permissions are more granular than share permissions. D. Full control can only be set using share permissions. Answer: C

QUESTION 25 Which of the following information would be on a system classification list? A. Disk drive size B. IP address C. Acceptable outage time D. Operating system version Answer: C

QUESTION 26 Which of the following is the MOST important step in creating a system classification list? A. Verifying the OS manufacturers B. Locating a hosting facility C. Consulting with the system manufacturers D. Interviewing system owners Answer: D

QUESTION 27 When troubleshooting hardware issues with a server, which of the following is MOST likely to cause a problem in receiving vendor support? A. Third party cables B. Third party memory C. Signed drivers D. Server type Answer: B

QUESTION 28 An administrator has ordered a new server and setup a dedicated RAID 1 array for the application database. While troubleshooting with performance monitoring tools, the administrator is receiving lower read/write speeds than expected. Which of the following would be the MOST likely cause for the lower performance? A. The BIOS needs to be upgraded. B. The administrator did not add the right amount of memory. C. There is a cooling issue with the server. D. The administrator did not order high enough RPM drives. Answer: D

QUESTION 29 Which of the following is a benefit of software RAID? A. Increased data integrity B. Higher performance C. Lower cost to implement D. More storage possibilities Answer: C

QUESTION 30 Which of the following RAID levels would provide the BEST performance with no fault protection? A. RAID 0 B. RAID 1 C. RAID 3 D. RAID 5 Answer: A

<http://www.passleader.com/sk0-003.html> QUESTION 31 Which of the following describes how to calculate the amount of storage in a RAID 5 array? A. Number of drives X capacity of the smallest drive B. (Number of drives - 1) X capacity of the smallest drive C. Number of drives X capacity of the largest drive D. (Number of drives + 1) X capacity of the smallest drive Answer: B

QUESTION 32 Which of the following BEST describes a DAS? A. A collection of disks presented as storage to multiple servers through dedicated channels. B. A collection of disks presented as storage to a single server through an existing network. C. A collection of disks presented as storage to a single server through directly attached technologies. D. A collection of disks presented as storage to multiple servers through an existing network. Answer: C

QUESTION 33 Which of the following are ways to transport SAN traffic? (Select TWO). A. Fibre Channel B. iSCSI C. NFS D. SATA Answer: A, B

SATA B. iSCSI C. SCSI D. Fiber channel
E. PATA Answer: BD QUESTION 34 Which of the following media types can hold the GREATEST amount of data? A. DVD B. SDLT C. LTO
D. Blu-Ray Answer: C QUESTION 35 Which of the following keystrokes allows installation of third party storage drivers during a Windows set-up? A. F6 B. F7
C. F8 D. F9 Answer: A QUESTION 36 Which of the following expansion cards would be necessary to increase fault tolerance in a VoIP server? A. Second Modem
B. Second CPU C. Second HBA D. Second PBX card
Answer: D QUESTION 37 Which of the following would provide the BEST reference of normal server performance for a company's environment? A. OEM website B. Software logs
C. Baseline documentation D. Pre-installation plans Answer: C QUESTION 38 Which of the following should be done before and after a service or repair is performed on a server? A. Defrag
B. IPCONFIG /release C. Firmware update D. Baseline
Answer: D QUESTION 39 Which of the following is the GREATEST environmental concern for a server operating environment? A. Temperature B. Lighting C. Structural columns
D. Elevation Answer: A QUESTION 40 A server connects to iSCSI presented SAN storage array through a dedicated NIC; however, the SAN traffic is passed on the same switches as the Ethernet network and VoIP traffic. The size of the presented drive is 700GB. The administrator has noticed a decrease in storage performance. Which of the following is MOST likely the cause? A. The servers power supply is starting to fail and causing the iSCSI NIC to intermittently lose power. B. There are too many users attempting to access the iSCSI presented disk.
C. The other network traffic is causing packet delays in the iSCSI network. D. The SAN is nearing capacity and should be expanded. Answer: C
